Programming Languages

- JavaScript
- TypeScript
- Python
- C++

Frameworks & Tools

- React
- Node.js
- NestJS
- Next.js
- GraphQL
- AWS
- AWS CDK
- Docker

AI & Integrations

- Claude AI (Skills & Agents)
- AI Product Integration
- Meta Graph API
- Stripe
- SSE Streaming

Databases

- MongoDB
- PostgreSQL
- MySQL
- DynamoDB
- Firebase

Languages

- Spanish (Native)
- English (Upper Intermediate (B2))

Summary

Software Engineer with 5 years of experience building scalable web applications across Fintech, EdTech, and e-commerce. Versatile and quick to adapt to new technologies, having worked with React, Next.js, Node.js, Python, Django, Vue.js, and AWS depending on what each project needed. Currently building AI-powered products at a WhatsApp sales automation startup, driving merchant activation across 5 LATAM markets.

Experience

YaVendio

01/2026 - Present

Software Engineer

React Next.js TypeScript Python Microservices Claude AI Cursor

Building a WhatsApp sales automation platform, driving merchant activation and growth across LATAM with AI-powered features and microservices.

- Created custom Claude AI skills and agents (hooks, slash commands, MCP integrations) using Cursor and Claude Code to automate internal workflows, accelerating development cycles across the engineering team.
- Redesigned the merchant onboarding flow with an AI-powered conversational assistant, improving activation rates by 85% across 5 LATAM markets with i18n support.
- Built billing, campaigns, and referral features with Stripe and Meta integrations, enabling self-service monetization that activated 23+ merchants in the first months.
- Implemented backend microservices in Python with AWS Lambda and API Gateway to support platform operations and AI integrations across multiple LATAM regions.

Aimo

05/2024 - 12/2025

Full Stack Developer

React Next.js Node.js NestJS GraphQL MongoDB Docker GCP Firebase AWS Windsurf Microservices

Developed scalable web applications for real-time operations using microservices, with an end-to-end focus on performance, cloud infrastructure, and user experience.

- Developed scalable microservices and APIs with NestJS, MolecularJS, and MongoDB to handle real-time order processing for 200+ locations.
- Built web interfaces using React, Next.js, and Ant Design with GraphQL and WebSockets, enabling real-time operations monitoring across all locations.
- Optimized cloud infrastructure on GCP and Firebase, improving system stability and scalability for financial integrations.
- Leveraged Windsurf AI-assisted development to accelerate feature delivery and code quality across the team.

Destacame

02/2022 - 04/2024

Full Stack Developer

Django Flask Vue.js AWS AWS CDK API Gateway Amazon S3 DynamoDB TypeScript Vuetify

Developed web solutions for the Fintech sector, leading banking integrations and deploying serverless architectures on AWS.

- Built backend integrations with Django/Flask and frontend with Vue.js for Santander banking services, serving 4M+ users managing their debt payments.
- Deployed serverless authentication flows using AWS Lambda, API Gateway, and DynamoDB with AWS CDK, supporting the platform's growing user base.

Forma | Moovmedia Group

02/2021 - 02/2022

Frontend Developer

React Angular TypeScript PHP VanillaJS MJML UI/UX

Developed web interfaces and maintained corporate platforms for major clients such as Bupa Clinics, with direct client communication and consistently high satisfaction.

- Maintained and improved 10+ web platforms for corporate clients including Bupa Clinics using React, Angular, PHP, and Vanilla JS, managing requirements directly with stakeholders.
- Automated large-scale marketing campaigns by developing responsive email templates with MJML, ensuring cross-device compatibility.

Projects

Elegimos.pe

Python Django PostgreSQL Node.js Computer Vision Sentiment Analysis

Political analysis platform for the 2021 Elections. I implemented advanced data filters and a facial emotional recognition feature for candidate analysis.

Education

University of Engineering and Technology (UTEC)

01/2019 - Present

Bachelor's Degree in Computer Science

Volunteer

WAWA Laptop, Hack Space Peru, MakerLab Peru

Tech Coach & Hackathon Mentor

Led programming and web development workshops for students and girls in STEM programs, and provided technical mentorship for university hackathons.
